

ABSTRACT

A guiding pillar trim (14) for a side-curtain airbag system (12) of a vehicle (10) is provided. The guiding pillar trim (14) includes a panel (44) for covering a vehicle body structure (10). This panel (44) has a guide member (54) coupled thereto that is movable between a trim configuration and a ramp configuration. In the ramp configuration, the guide member (54) directs the deployment of a side-curtain airbag (34) in a predetermined direction.
